(54) Title: MUSCULOSKELETAL DYNAMICS ASSESSMENT UNDER WEIGHT-BEARING CONDITIONS

(57) Abstract: In some illustrative embodiments, a method for the assessment of an ankle or the like includes: measuring muscu-  
loskeletal dynamics of an ankle or the like of a patient (P) with the patient (P) in a posture that is weight-bearing through the ankle  
or the like. In some embodiments, a device for assessing musculoskeletal dynamics of an ankle or the like of a patient (P) in a  
weight-bearing posture can include: a platform (60) to support a patient (P) in a weight-bearing posture; a drive mechanism (30) to  
impart pulse movement to the platform (60); a position sensor (20) to sense a position of the platform (60); a force or torque sensor  
(40) to sense a force or torque on the platform (60); a control system (100) to determine musculoskeletal dynamics based on outputs  
from the displacement sensor (20) and the force or torque sensor (40).

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"
